Subject: Withdrawal of ESA Petitions for Bluestripe Shiner and Broadstripe Shiner

Dear U.S. Fish and Wildlife Service,

In light of new information on their status, attached please find a letter withdrawing two species from the multispecies petition for 404 southeastern species filed in 2010 by the Center for Biological Diversity. The species we are writing to withdraw are the bluestripe shiner and broadstripe shiner, which are found in Alabama, Georgia, and Florida.

Please contact me if you have any questions or would like to proactively share new information on the status of the other petitioned species.

Best regards,

Tierra

Thank you Tierra. Just a quick note to acknowledge that we have received the withdrawal.
